## CBSE MERIT GAIN TEST PAPER

CLASS - X Mathematics (Similar Triangle)

1. If $\triangle A B C$ is similar to $\triangle D E F<B=60^{\circ}$ and $\angle C=50^{\circ}$, then degree measure of $<D$. Ans-70 ${ }^{0}$
2. In Fig-(1) if $D E \| B C$ find the value of $x$ Ans-10cm

3. In the given fig-(ii) $P Q 24 \mathrm{~cm}, Q R=26 \mathrm{~cm},<P A R=90^{\circ}, P A=6 \mathrm{~cm}$ and $A R=8 \mathrm{~cm}$ find the value of $<Q P R$.

Ans- $\angle \mathrm{QPR}=90^{\circ}$

4. In given fig-(iii) $\triangle \mathrm{ABC}$ and $\triangle \mathrm{DEF}$ are similar, $\mathrm{BC}=3 \mathrm{~cm}, \mathrm{EF}=4 \mathrm{~cm}$, and area of triangle $A B C=54 \mathrm{~cm}^{2}$ find the area of $\triangle D E F$. Ans-96 sq.cm

Fig-(iii)
5. If the area of two similar triangles are in the ratio $16: 25$ then the ratio of their corresponding sides is. Ans-4:5
6. If $\operatorname{ar}(\triangle \mathrm{ABC}): \operatorname{ar}(\triangle \mathrm{DEF})=25: 81$ then $\mathrm{AB}: D E$ is. Ans-5:9
7. A right triangle has hypotenuse $P \mathrm{~cm}$ and one side $q \mathrm{~cm}$. If $p-q=1$, Find the length of the third sides. Ans $\sqrt{2 p-1}$
8. $A B C$ is an isosceles triangle angled at $B$. Two equilateral triangles are constructed on side $B C$ and $A C$ in Fig(iv) , prove that area of $\triangle B C D=1 / 2$ area of $A C E$.
9. The diagonals of a quadrilaterals intersect each other at the point 0 such that $A O / O C=B O / D O$ show that $A B C D$ is a trapezium.
10. $\triangle P Q R$ is a triangle right angled at $P$ and $M$ is point on $Q R$
 such that $P M \perp Q R$. Show that $P M^{2}=Q M \times M R$.
