## Class 09 Chapter - Circle CBSE Test Paper - 01

## One mark Questions

1. Q . In the figure, $\angle \mathrm{ACP}=40^{\circ}$ and $\angle \mathrm{BPD}=120^{\circ}$. Then find $<\mathrm{CBD}$

2. $Q$. In the given fig $O$ is centre of circle, $\angle A C O=35$ and $<A B O=45$, then what is the value of $\angle B O C$

3. Q . In the figure ' $O$ ' is the centre of the circle, $<\mathrm{ABO}=20^{\circ}$ and $<\mathrm{ACO}=30^{\circ}$ where $\mathrm{A}, \mathrm{B}, \mathrm{C}$ are points on the circle. Find the value of $x$.

4. $\mathrm{Q} . \angle \mathrm{ADB}=90^{9}$ and $\angle \mathrm{ABC}=30^{\circ}$ then find the value of $\angle \mathrm{CAO}$ is

## Two marks Questions

5. Q. $A B C D$ is a cyclic quadrilateral in which $A C$ and $B D$ are its diagonals. If $\angle D B C=55^{\circ}$ and $\angle B A C=45^{\circ}$, find $<B C D$.

6. Q. Prove that if chords of congruent circles subtend equal angles at their centres, then the chords are equal.
7. Q. Suppose you are given a circle. Give a construction to find its centre
8. Q. Prove that the angle subtended by an arc at the centre is double the angle subtended by it at any point on the remaining part of the circle.
9. Q. Prove that equal chords subtend equal angles at the centre.
10. $Q$. In the figure, $O$ is the centre of the circle $\operatorname{Arc} B C D$ subtends an angle of $140^{\circ}$ at the centre. $B C$ is produced to $P$ and $C D$ is joined. Find measure of $<D C P$.

11. $Q$. $O D$ is perpendicular to chord $A B$ of a circle whose centre is $O$. If $B C$ is a diameter, prove that $C A=2$ OD

# JSMIN THITBIIL ACBSE Coaching for O(athematics and Science 

12. $Q$. In the figure $O$ is the centre of the circle and $\angle A B C=45^{\circ}$. Show that $O A \perp O C$

13. $Q$. Two concentric circles are with center $O$. $A B C D$ are the points of intersection with a line. If $A D=12$ cm and $B C=8 \mathrm{~cm}$ find the length of $A B, C D, A C$ and $B D$

Q. ABCD is a cyclic quadrilateral. $O$ is the center of the circle if $<B O D=160$ find $<B P D$

14. $Q$. In the figure, $\angle A O B=90^{\circ}$ and $\angle A B C=30^{\circ}$, then find the measure of $\angle C A O$

15. Q. If two equal chords of a circle intersect within the circle; prove that the segments of one chord are equal to corresponding segments of the other chord
